

General Insurance Ratemaking and Reserving Exam

Fall 2024

Important Exam Information:

[Exam Registration](#)

Candidates may register online or with an application.

Order Study Notes

There is no study note package for this examination.

[Introductory Study Note](#)

The Introductory Study Note has a complete listing of all readings as well as errata and other important information.

Case Study

There is no case study for this examination.

[Past Exams](#)

Past Exams from Fall 2020-present are available on SOA website.

[Updates](#)

Candidates should be sure to check for updates on the Exam Study page periodically for additional corrections or notices to the current syllabus.

Appendices

The Appendices to *Fundamentals of General Insurance Actuarial Analysis* are part of the course of reading for this examination. They are mentioned in specific topics in the syllabus, although they apply to multiple topics. As a result, they can be read with the various topics or separately.

General Insurance Ratemaking and Reserving
FALL 2024

1. Topic: Introduction and Key Considerations
Learning Objectives
The candidate will understand the key considerations for and key concepts underlying general insurance actuarial work.
Learning Outcomes
The Candidate will be able to: <ul style="list-style-type: none">a) Identify sources of professionalism requirements and good practiceb) Demonstrate knowledge of good practice related to actuarial workc) Use the actuarial control cycle to frame actuarial workd) Understand the components of ultimate valuese) Explain how estimates of ultimate values are usedf) Demonstrate the importance of understanding key terminology and interrelationshipsg) Identify different types of data used for actuarial workh) Explain the responsibilities of the actuary related to datai) Describe how and why data are segregated and aggregatedj) Describe qualitative information required for actuarial workk) Understand the sources of data and information for actuarial workl) Understand credibility as used for actuarial workm) Explain the application of trend adjustments in actuarial workn) Illustrate the types of trend that influence the future cost of claims, expenses, and premiumso) Identify the actuary's responsibilities with regards to documentation for actuarial workp) Describe the role of professional judgment in actuarial work

Friedland, Second Edition, 2022<ul style="list-style-type: none">○ Part 1: Introduction○ Part 2: Key Concepts (excluding Chapter 10)<i>[Candidates may also use First Edition, 2013 (Parts 1 & 2) with 2019 Supplement (Chapter 4)]</i>• <i>Actuarial Standards of Practice</i>, Actuarial Standards Board of the American Academy of Actuaries,<ul style="list-style-type: none">○ No. 25, Credibility Procedures, 2013

General Insurance Ratemaking and Reserving
FALL 2024

2. Topic: Preparing Claims and Exposure Data for Actuarial Work

Learning Objectives

The candidate will demonstrate the ability to prepare claims and exposure data for general insurance actuarial work.

Learning Outcomes

The Candidate will be able to:

- a) Create development triangles of claims and counts from detailed claim transaction data
- b) Describe the different types of exposures used for conducting actuarial work
- c) Calculate written, earned, in-force and unearned premiums for portfolios of policies with various policy terms and earnings patterns
- d) Adjust historical earned premiums to current rate levels
- e) Understand types of changes influencing average premium levels
- f) Describe adjustments needed to estimate ultimate premiums

Resources

- *Fundamentals of General Insurance Actuarial Analysis*, J. Friedland, Second Edition, 2022
 - Part 3: Preparing the Data (excluding sections 12.6.4 & 12.6.6)

[Candidates may also use First Edition, 2013 (Part 3) with 2019 Supplement (Chapter 11) (excluding sections 11.8.4 & 11.8.6)]

General Insurance Ratemaking and Reserving
FALL 2024

3. Topic: Projecting Ultimate Claims

Learning Objectives

The candidate will know how to calculate and evaluate projected ultimate values.

Learning Outcomes

The Candidate will be able to:

- a) Identify considerations for selecting methods for estimating ultimate claims
- b) Identify and describe good practice related to projecting ultimate claims with regard to required data, large claims, reinsurance recoverables, and comparison of current to prior actuarial work
- c) Identify the types of development triangles that can be used for investigative testing
- d) Analyze development triangles for investigative testing
- e) Describe the key assumptions underlying the following projection methods: development method, frequency-severity methods, expected method, Bornhuetter Ferguson method, Benktander method, Cape Cod method, Generalized Cape Cod, and Berquist-Sherman adjustments to the development method
- f) Demonstrate knowledge of good practice related to projecting ultimate values
- g) Estimate ultimate values using the methods cited in (e)
- h) Explain the effect of changing conditions on the projection methods cited in (e)
- i) Assess the appropriateness of the projection methods cited in (e) in varying circumstances
- j) Evaluate and justify selections of ultimate values based on the methods cited in (e)

Resources

- *Fundamentals of General Insurance Actuarial Analysis*, J. Friedland, Second Edition, 2022
 - Part 4: Basic Methods for Estimating Ultimate Claims (excluding sections 15.8, 16.7, 17.8, 18.8, 19.6, 20.6, 21.3.5, & 21.3.6)
 - Appendices A through F (excluding sections A.3.6, A.5, D.6 and D.7)

[Candidates may also use First Edition, 2013 (Part 4 and Appendices A – F) with 2019 Supplement (Chapters 14, 19 & 20) (excluding sections 14.8, 15.7, 16.8, 17.8, 18.6, 19.6, 20.5.5 & 20.5.6)]

General Insurance Ratemaking and Reserving
FALL 2024

4. Topic: Financial Reporting
Learning Objectives
The candidate will understand financial reporting of claim liabilities.
Learning Outcomes
The Candidate will be able to: <ul style="list-style-type: none">a) Describe the key assumptions underlying ratio and count-based methods for estimating unpaid unallocated loss adjustment expensesb) Estimate unpaid unallocated loss adjustment expenses using ratio and count-based methodsc) Evaluate and justify selections of unpaid unallocated loss adjustment expenses based on ratio and count-based methodsd) Demonstrate knowledge of good practice related to actuarial work supporting financial reportinge) Describe the components of claim liabilities in the context of financial reportingf) Calculate claim liabilities
Resources
<ul style="list-style-type: none">• <i>Fundamentals of General Insurance Actuarial Analysis</i>, J. Friedland, Second Edition, 2022<ul style="list-style-type: none">○ Part 5: Financial Reporting and the Establishment of Reserves (Chapter 23 & 24) (excluding section 23.4)○ Appendices A through F (excluding sections A.3.6, A.5, D.6 and D.7) <p><i>[Candidates may also use First Edition, 2013 (chapters 22 & 23 and Appendices A-F) (excluding section 22.4)]</i></p>

General Insurance Ratemaking and Reserving
FALL 2024

5. Topic: Trending
Learning Objectives
The candidate will understand trending procedures as applied to ultimate claims, exposures and premiums.
Learning Outcomes
The Candidate will be able to: <ul style="list-style-type: none">a) Identify and describe the influences of portfolio changes on claim frequency and severityb) Identify the time periods associated with trending proceduresc) Analyze and evaluate trend for claims (including frequency, severity, and pure premium) and exposures (including inflation-sensitive exposures and premiums)d) Choose trend rates for claims (frequency, severity, and pure premium) and exposurese) Calculate trend factors for claims and exposures
Resources
<ul style="list-style-type: none">• <i>Fundamentals of General Insurance Actuarial Analysis</i>, J. Friedland, Second Edition, 2022<ul style="list-style-type: none">○ Part 6: Trending Procedures○ Appendices A through F (excluding sections A.3.6, A.5, D.6 and D.7) <p><i>[Candidates may also use First Edition, 2013 (Part 6 and Appendices A-F)]</i></p>

General Insurance Ratemaking and Reserving
FALL 2024

6. Topic: Ratemaking
Learning Objectives
The candidate will understand how to apply the fundamental ratemaking techniques of general insurance.
Learning Outcomes
The Candidate will be able to: <ul style="list-style-type: none">a) Describe the objectives of general insurance rate regulationb) Identify the different types of rate regulatory approaches for general insurancec) Describe the purpose of base rates and rating factors and explain how they are used to determine an insured's premiumd) Quantify different types of expenses required for ratemaking including expense trending procedurese) Incorporate underwriting profit and contingency margins in ratemakingf) Explain the requirements for loadings for catastrophes and large claims in ratemakingg) Calculate loadings for catastrophes and large claimsh) Apply loadings for catastrophes and large claims in ratemakingi) Describe the claim ratio and pure premium methods of ratemakingj) Calculate indicated rates and indicated rate changes using the claim ratio and pure premium methodsk) Demonstrate the use of credibility in ratemaking
Resources
<ul style="list-style-type: none">• <i>Fundamentals of General Insurance Actuarial Analysis</i>, J. Friedland, Second Edition, 2022<ul style="list-style-type: none">○ Part 7: Ratemaking (Chapters 28 through 32)○ Appendices A through F (excluding sections A.3.6, A.5, D.6 and D.7) <p><i>[Candidates may also use First Edition, 2013 (Chapters 27 through 31) and Appendices A through F]</i></p>

General Insurance Ratemaking and Reserving
FALL 2024

7. Topic: Analyze and evaluate real-life scenarios

Learning Objectives

The candidate will be able to define an approach for actuarial analyses supporting financial reporting and ratemaking analyses under various real-life scenarios. The candidates will be able to define funding requirements for self-insurers.

Learning Outcomes

The Candidate will be able to:

- a) Identify data and information requirements
- b) Conduct investigative testing
- c) Choose projection methods to estimate ultimate values
- d) Estimate ultimate values
- e) Justify selections of ultimate values
- f) Develop reserves for financial reporting

Resources

- *Fundamentals of General Insurance Actuarial Analysis*, J. Friedland, Second Edition, 2022
 - Appendices A through F (excluding sections A.3.6, A.5, D.6 and D.7)

[Candidates may also use First Edition, 2013 (Appendices A through F)]
